

## Progress report #2

Reporters	Amangeldy Mukhamejan Altynbek Nurmukhamed Merei Yeksanov
Project name	Products
Submit data	19.02.2023
URL	<a href="https://github.com/Mukhamedzhan034/GO.MMA">https://github.com/Mukhamedzhan034/GO.MMA</a>
Operating system	Windows 11

### Procedure:

#### Add CRUD handlers for Product Model

1. Create Product
2. Read Product
3. Update Product
4. Delete Product

### Results:

After creating the scheme, we use it to create models.

A model is a set of documents in a database that we can search for, and model instances provide individual documents that you can store and retrieve.
